Link for Residential customers to pre-select their cart size:

https://www.palmspringsdisposal.com/residential/green_cart_orders.htm

Choosing a Cart Size

- 35-gallon cart: Households with 1 or 2 occupants and very little yard waste will find that this will meet their needs. This size cart might also be a good choice for dwellings with limited storage space.
- 65-gallon cart: Households with 2+ occupants and limited yard waste should find that this will meet their needs. (For reference, this is the size of your BLUE recycling cart.)
- 95-gallon cart: Large households or properties with a considerable amount of weekly yard waste may find that this is their best choice.

[FAQ's and flyers](#) for food waste recycling changes
